

Walter.live AGENDA

16th September 2020

9.00 a.m. Welcome by Richard Harris, President Walter

Pre-machining

9.10 a.m. **How can I find the right tools for my machining process?** Introduction to a groundbreaking innovation in the area of digitalization.

9.35 a.m. **How can I speed up my planning process?** From planning and product data to programming, tool location or online procurement: Walter presents new solutions – for CAD/CAM and tool data management, as well as for tool and cutting data recommendations.

10.10 a.m. **How can I outsource tool management processes to become more efficient and focus on other issues?** Efficient tool management improves production processes and frees up resources. How? This presentation will provide answers to this question.

Machining

10.30 a.m. **How can I increase my productivity?** ... while avoiding machine downtimes and improving the reliability of my processes? We will show you how - with the next step of Tiger-tec® Gold and an innovative recessing system as well as micro-drills and thread formers.

11.40 a.m. **How can I analyse, monitor or improve my machining process?** With the Comara i-Cut real-time optimization programme and the Comara appCom solution platform, we are presenting two tools you need to achieve just that.

You can learn the answer to these and other exciting questions on 16th September 2020. Register now for free for the Walter.live event.
