

Walter Reconditioning

Edition 2023

_WALTER RECONDITIONING SERVICE

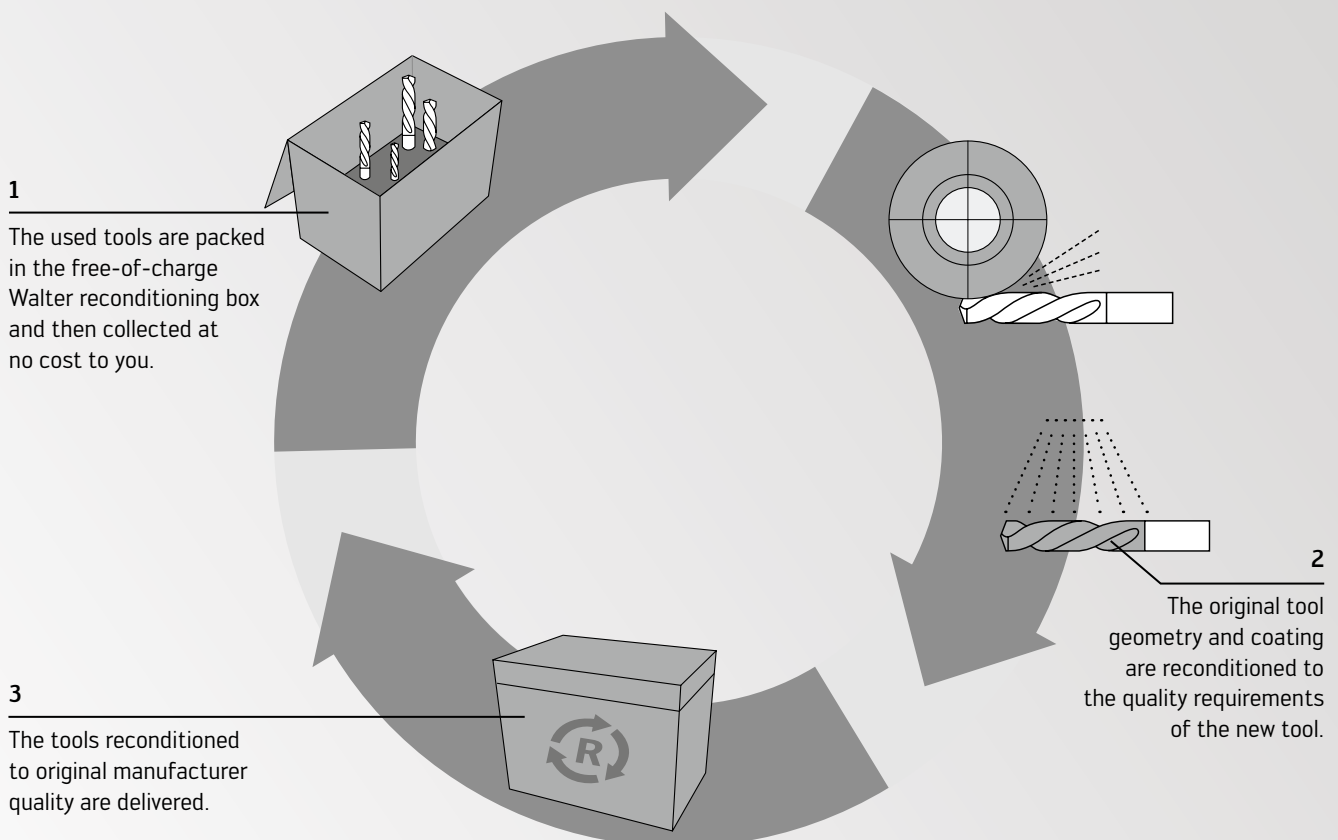

Reconditioning tools to manufacturer quality.

WALTER RECONDITIONING SERVICE: MANUFACTURER QUALITY PAYS OFF.

The Reconditioning Service from Walter Multiply makes a significant contribution towards lowering your production costs – because it can provide you with Walter Titex and Walter Prototyp tools that are as good as new, in the original manufacturer quality and all at an attractive price-performance ratio.

RECONDITIONING CYCLE:

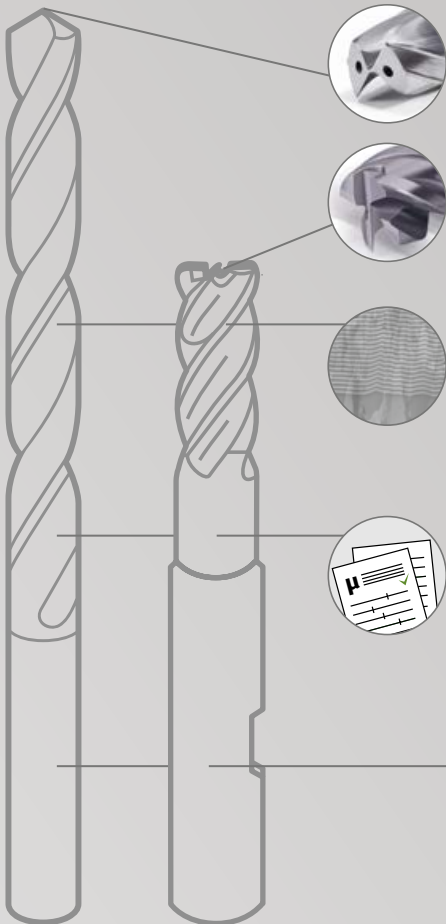

WALTER RECONDITIONING – FOR THE TOUGHEST DEMANDS

Demanding customers require us to give 100% at all times. This is also true for reconditioning – especially for high-performance tools. Walter Multiply reconditions your tool to “almost new” condition.

This has been proven in actual practice. The reconditioned tool impresses customers with its top performance. It's worth it, because the service life of your tool is extended each time it is reconditioned.

OUR MARK OF 100% QUALITY

Look out for the "Original Walter Quality" label. This label indicates that a tool has been reconditioned to original manufacturer quality. It even appears in the ordering documents, enabling you to see the tools for which we recommend our Reconditioning Service.

ORIGINAL GEOMETRIES

Cutting edge geometries are extremely complex. During reconditioning, Walter calls upon its extensive manufacturing experience to return them to their original condition.

ORIGINAL COATING

When it comes to tool performance, the coating is key. Only Walter uses the original coating process during reconditioning.

ORIGINAL TOLERANCES

These marks of quality are just as important when reconditioning as when Walter manufactures a completely new tool. To achieve this, we only use the most up-to-date measuring methods.

RECONDITIONING RANGE

- Walter Titex
solid carbide drills
 $D_c = 3.00-32.00$ mm
- Walter Prototyp
solid carbide milling cutters and thread milling cutters
 $D_c = 6.00-32.00$ mm

50% LOWER COSTS

Tools are often disposed of far too early, even though Walter can restore the tool a number of times to original manufacturer quality. Benefit from reduced costs, reliable production processes and consistent tool life by having your tools reconditioned at our Reconditioning Centre, which is available worldwide.

That's how you save up to 50% on your tool costs!
